DETAILED ACTION

This Application has been examined. The original claims 1-25 are pending. The examination results are as follows.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the: “a power source” (claims 4, 10, and 18), “a PCB” (claims 5, 11, and 19) (which is preferred to as a PCB substrate 113, see specification, page 18, paragraph [0063]) /must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2629

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: some editorial errors have been found; for example: in page 5, lines 4-5, "the low voltage output connector 32" should be changed to -- the low voltage output connector 32b --; in page 11, one line 3 of paragraph [0030], "a high-voltage part" should be changed to -- a low-voltage part --.

It is in the best interest of the patent community that applicants, in their normal review and/or rewriting of the claims, to take into consideration these editorial situations and make changes as necessary, in order to avoid the unnecessary rejection(s) under 35 USC 112, first and/or second paragraph(s).

Appropriate corrections are required in response to this Office action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 7-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7-14 recite the limitation "the first high-voltage part" in lines 2-3 of the base claim 7. There is insufficient antecedent basis for this limitation in the claims.

For the purpose of this Office action, the limitation "the first high-voltage part" recited in lines 2-3 of claim 7 is changed to -- the high-voltage part --.

Allowable Subject Matter

6. Claims 1-25 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a backlight device and methods for protecting a backlight driving circuit of an LCD device. Each of the independent claims 1, 7 and 15 requires a protection circuit (107) between the low-voltage part (103) and the connection part (105), see Figure 7; whereas, the closest prior art, the Hwang patent (U.S. Patent No. 6,812,916), the Nishiyama et al patent (U.S. Patent No. 7,077,543), and the Wessels et al patent (U.S. Patent No. 6,094,015), which teach backlight devices and methods for controlling backlight driving circuits of LCD devices, which, either alone or in combination, fails to teach the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. This application is in condition for allowance except for the following formal matters:

The objections and rejections recited in items 2-5 discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

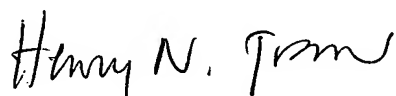

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
